### **About Nanotech Security**

Nanotech Security Corp. has been a leading innovator in the design and production of advanced banknote and commercial branding authentication products. Nanotech's *KolourOptik*<sup>®</sup> and *Plasmogram*<sup>™</sup> products are nanotechnology based optical imaging product platforms originally inspired by the unique optical properties of the iridescent wings of the Blue Morpho butterfly. Our nano-optical products produce intense, high definition optically-variable images and colour-shift optical thin films. Activated by a simple tilt or rotation, with higher resolutions than the best LED-displays, they are ideal for authentication of currency, passports, and identification cards in addition to distinguishing branded goods from counterfeits.
