

Nanotech Launches First Commercial Products

VANCOUVER, British Columbia – April 2, 2019 – Nanotech Security Corp. (TSXV: NTS) (OTCQX: NTSFF) ("Nanotech" or the "Company"), a leading innovator in the research, creation and production of nano-optic structures and colour-shifting materials used in brand protection and brand enhancement, announces the release of its first products specifically targeting the commercial brand market.

LiveLogo™ – employs Nanotech's image switch technology to create a unique and compelling three-image story. It creates an immediate visual impact, capturing and holding the customer's attention as they tilt the feature to experience multiple image transitions. The image designs are customizable and can include items such as a customer's logo, tagline, or product.

Dynamic Portrait™ – brings together high-fidelity images with striking visual elements to create a memorable and enduring visual experience. It displays images far beyond conventional print resolution and allows for text and other design elements to be added for additional brand impact and authentication. This product is ideal for customers to showcase an image of their endorsement model or even a high-fidelity image of their product.

To support the launch of LiveLogo and Dynamic Portrait, Nanotech has completed extensive efforts on its North American supply chain development and vendor qualification. These efforts ensure that LiveLogo and Dynamic Portrait can be produced and delivered to customers within short lead-times and in commercial volumes ranging from thousands to millions.

"We are very pleased to launch our first products designed specifically for the commercial market," said Nanotech's President and CEO Troy Bullock. "Alongside our aggressive supply chain development, they represent important milestones in the execution of our commercialization and future growth strategy, as well as our goal to deliver innovative products built upon our exceptional technology."

[LiveLogo](#) and [Dynamic Portrait](#) can be viewed on Nanotech's website. To arrange for a detailed presentation of the products please contact the company at 1.604.678.5775 or sales@nanosecurity.ca.

About Nanotech

Nanotech researches, creates and produces nano-optic structures and colour-shifting materials used in authentication and brand enhancement applications across a wide range of markets including banknotes, tax stamps, secure government documents, and commercial branding.

The Company's nano-optic technology employs arrays of billions of nano-indentations that can be impressed or embossed onto a wide range of substrate materials including polymer, paper, metal, or fabric. By using sophisticated algorithms to direct an electron beam lithography system, the Company creates visual images with effects such as 3D, perceived movement, and the display of high-definition colours.

Additional information about Nanotech can be found at the Company's website www.nanosecurity.ca, the Canadian disclosure filings website www.sedar.com or the OTCMarkets disclosure filings website www.otcmarkets.com.
