About Nanotech Security

Nanotech designs, manufactures and markets nano-optic OVDs and OTF products. These products have brand protection and enhancement applications across a wide range of markets including banknotes, secure government documents, commercial branding, and the pharmaceutical industry. The Company is initially focusing its efforts on the banknote market due to its high margins and its established customer base.

The Company's nano-optic technology employs arrays of billions of nano-indentations that are impressed or embossed onto a substrate material such as polymer, paper, metal, or fabric. By using sophisticated algorithms to direct an electron beam, the Company creates visual images with colour shifting effects such as 3D, perceived movement, and can also display high-definition colours including skin tones, and whites and blacks, which are not possible using traditional holographic technology.

Additional information about Nanotech can be found at the Company's website www.nanosecurity.ca, the Canadian disclosure filings website www.sedar.com or the OTCMarkets disclosure filings website www.otcmarkets.com.
