

# News Release

TSX-V, Tier 1: "NTS"

OTCQX: "NTSFF"

## ***Nanotech Security Corp. Begins Trading on OTCQX®***

*Nanotech announces Nanotech shares to begin trading on the OTCQX® marketplace*

**VANCOUVER, British Columbia – February 25<sup>th</sup>, 2014** – Nanotech Security Corp. (TSX-V: NTS) (OTCQX: NTSFF) is pleased to announce that the Company's common shares commence trading today on the OTCQX® in the United States under the ticker symbol "NTSFF".

Nanotech Security Corp. will continue to trade on the TSX-Venture Exchange under its existing symbol "NTS".

"We are pleased to welcome Nanotech Security to the OTCQX® marketplace," said R. Cromwell Coulson, President and CEO of OTC Markets Group. "Nanotech joins the many TSX and TSX Venture Exchange listed companies that have chosen to trade on OTCQX® to provide their U.S. investors transparent trading and convenient access to their news and disclosure. We look forward to working with Nanotech's management team as they continue to grow their visibility in the U.S. market." OTCQX® International is a segment of the OTCQX® marketplace reserved for high-quality non-U.S. companies that are listed on a qualified international exchange, undergo management reviews and provide their home country disclosure to U.S. investors. U.S. investors can find current financial disclosures and Real-Time Level 2 quotes for the company on [www.otcmarkets.com](http://www.otcmarkets.com).

Doug Blakeway , Nanotech CEO commented: "We are pleased to have qualified for trading on OTCQX®, which will better enable us to provide our U.S. investors with timely news and information to help them better analyze value and trade our securities"

Sanders-Ortoli-Vaughn-Flam-Rosenstadt LLP will serve as Nanotech's Principal American Liaison on OTCQX®, responsible for providing professional guidance on OTCQX® requirements and U.S. securities laws.

## **About Nanotech Security**

Nanotech Security Corp. is a leading innovator in the design and commercialization of advanced security products. Nanotech's *KolourOptik*® and *Plasmogram*® products are nanotechnology based product platforms which were originally inspired by the unique optical properties of the iridescent blue wings of the Blue Morpho Butterfly where nano-scale structures on the surface cause the brilliant blue colour. Nanotech images produces intense, high definition OVDs (optically variable devices) that are ideal for brand authentication and for distinguishing currency, documents, personal identification, consumer electronics, and more from counterfeiters. *KolourOptik*® creates unique, easy to authenticate images through interaction of natural light with nano-sized arrays of surface indentation structures which are at nano-scale (billionth of a meter). These nanostructures create vivid colour images, activated by a simple tilt or rotation, which creates exceptionally crisp and bright colored images, with higher resolutions than even LED-displays.

Additional information about Nanotech and its technologies can be found at [www.nanosecurity.ca](http://www.nanosecurity.ca) or [www.sedar.com](http://www.sedar.com) or [www.otcmartets.com](http://www.otcmartets.com)
